

"Jade Helm 15" Means:

What is the meaning of the name "Jade Helm 15" given to a federal standing army and military exercise? Since I could not find anything on its meaning and why it was used on the internet I turn to Webster's New World Dictionary:

helm:

1. The wheel or tiller by which a ship is steered.
2. The control or leadership of an organization. Government.

jade:

1. The side: supposed to cure pains in the side.

It's not comforting to put those two meanings together and only a moron would dismiss this title for a military operation by one's own government in 2015. **The operation is to cure the pains in the side of a tired dissolved federal government.** Texas is red on the Jade Helm 15 map which they have coded as "hostile." So the unconstitutional federal army and other special operations forces will be curing the pain in the side of dissolved overthrown federal government in the hostile state or land of Texas.

I don't like it and I am alarmed by it because it is unconstitutional in the first place and because it has a evil name. Those who dismiss this activity have their heads in the sand and would be better off wearing a tin foil hat.
